Criterion: 2
Metric: 2.12.i

2.12. Career Counseling and Placement cell

Career counseling assists individuals with their career development by evaluating their strengths, helping to guide their job search, and connecting them with useful career resources. Many career counselors and guidance professionals administer skills assessments to determine what a person can do well and show them how to use positive attributes to their advantage. A career counselor can help a student find an industry and even specific roles that might mesh with their abilities and interests. Many students are determined to achieve academic excellence, and there's a lot of pressure on those who are pursuing a degree to perform well so that they can lock down a good job after college. Whether that pressure comes from parents, internalized beliefs, peers, or professors, it can make the transition to post-graduation life challenging. Career counseling for college students can help them manage those feelings. They can also give students tips for addressing concerns like anxiety and refer them to other mental health professionals if necessary.

2.12.1 Number of career counseling session organized for each group: Three sessions were organized by career counseling and placement cell during the session to impart the awareness about career counseling among the students of BA., B.Com. 1st, 2nd and 3rd year collectively.

2.12.2 Number of Placement Drives: NIL

2.12.3 Self Employed Modules Organized: NIL

2.12.4 No. of students Benefitted: 150
